### Changes to the Specification

Rewrite the paragraph starting at page 1, line 3 as follows:

#### --FIELD OF THE INVENTION

The invention relates to a novel class of compounds which have a structures related to naturally and synthetically occurring chalcones, as well as to methods for preparation of such compounds and to pharmaceutical uses thereof.--

Rewrite the paragraph starting at page 1, line 7 as follows:

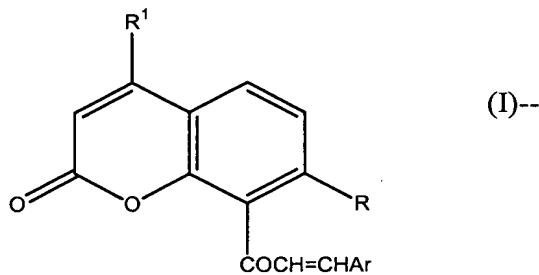

#### --TECHNICAL FIELD

The compound 1,3-diphenyl-2-propene-1-one is known by the trivial name chalcone. Many naturally occurring flavanoids share structural features with chalcone and are referred to by the generic term "chalcones". Also certain flavanoids, including ones which are classified as chalcones, have recently been demonstrated to have anticancer activity (Cancer Research, 48, 5754, 1988) and chemo[reventive activity in some tumours (J. Nat. Prod. 53, 23, 1990).--

Rewrite the paragraph starting at page 1, line 28 as follows:

#### --SUMMARY OF THE INVENTION

Thus according to one aspect of the present invention, there is provided a compound of Formula (I):
